November 2011 • Issue # 28

Welcome to BRAKING NEWS!

Pressure Bleeder Rewards Program

To us at NBS, there is nothing more rewarding than the many comments we receive from the scores of workshops out there that have purchased a Bleedpro Brake Pressure Bleeder. Customers that tell us they have doubled the amount of fluid changes they do, and others that tell us it is the best investment they ever made.

We are very grateful for the many referrals given to us in the past, and excited to launch a new rewards program for referrals in November and December 2011. Any customer who has purchased a Bleedpro 12V machine and recommends to a prospective buyer which results in a sale will receive a \$100 Coles Group Gift Card!

So if you know of someone who would benefit from having this machine—give us the details! If we make a sale—then you will receive your gift voucher shortly after!

Trailer Hydraulic Backing Plates

9" x 1 3/4" Backing Plate Assembly PN 311100/1

\$35.00 ea.

Trailer 3/4" Wheel Cylinders

Wheel Cylinder PN 319010

\$15.00 ea.

Trailer Electric Brake Magnet Kit

Magnet Kit, including Clip and Spring PN 339010

\$38.00 ea.

Caliper Rebuilding – Making life easier for mechanics!!

The NBS range of reconditioned and new calipers is growing all the time. In the coming weeks we will be launching a completely new caliper program, with much larger stocks been moved down to our Melbourne distribution centre to make for faster delivery to our customers.

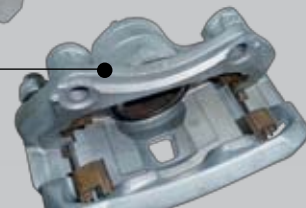

Our range is focused on the 'problem' type calipers, and includes many innovative fixes to issues relating to calipers on a range of vehicles.

Our calipers come with everything you need for a professional repair, including hardware.

BA/BF FALCON
Front/Rear Calipers, including revised pistons and pins to prevent retraction and noise issues.

N16 PULSAR
front calipers, with revised pins to prevent rattle issues.

DUAL MASS FLYWHEELS

The automotive industry is now seeing vehicles fitted with dual mass flywheels on a regular basis. So what is a dual mass flywheel?

Essentially it is a flywheel with two separate main components – the primary part nearest the engine, and the secondary part to which the clutch is bolted. Incorporated within both parts is a dampening mechanism to limit the torque from exceeding the manufacturers specifications for that vehicle, and to dampen torsional vibrations from the engine.

So the main purpose is to limit drivetrain noise and vibration. A very good idea theoretically, but practically often means a clutch assembly that cannot stand as much punishment as a normal solid flywheel setup. This becomes a problem, especially in heavy use applications, such as towing. They simply don't go the distance.

One answer to this problem is the Clutchpro range of replacement solid flywheel kits. Clutchpro is one of the countries leading brands of clutches, and have an extensive range of solid flywheel kits.

Vehicle manufacturers and some industry bodies claim that fitting a solid flywheel will lead to gearbox failure. Our experience, including with our own company vehicles, is that it doesn't. Yes, there is the point that on some vehicles you will experience vibration, especially at low revs and under load. For a long lasting replacement clutch option for vehicles with dual mass flywheel, give the NBS team a call on 1800 780 858, and we will be more than happy to give you some solid flywheel options where available.

We are one of Northern Victoria's largest stockists of clutches, and we freight all over the country. Try the Clutchpro advantage today!

NEW PRODUCTS AT NBS!

PW19003 Camaro 11" Delco Booster

A Bolt on replacement for 67-68 Camaros, with original Delco markings.

PW19009 Twin Diaphragm Delco Chev Booster

A replacement bolt on 9" twin diaphragm booster for 1957 Chev's.

PW19010 Universal Replacement Booster

11" Delco single Diaphragm replacement booster.

PW19012 Chev C20/C30 Booster

11" Twin Diaphragm replacement booster for Chev C20's and C30's.

Sneak Preview...

Electric Brake Master Cylinder and Booster

Still under R&D at the moment, but due for release early in the new year is the PW19007 electric brake master cylinder and booster. A great new product for the hot road market, as well as for special needs vehicles, where there are vacuum supply issues. It consists of a master cylinder and booster assembly in one, with a separate electric pump to provide boost.

AN EXTENSIVE DELIVERY NETWORK

Brake and Clutch Parts Delivered Australia Wide!

Overnight Carriers used daily by NBS

- Startrack (Preferred)
- Toll Priority
- Ipec Road Express
- TNT
- Express Post

Since the closure of Vicfast couriers at the end of August, NBS have carefully considered our overnight freight options. We are now using Startrack Express as our preferred overnight carrier Australia wide.

SAME DAY FREIGHT NETWORK!

Echuca/Kyabram Area

4 runs daily by Woodward's / A1 / Bob Bertolis / Scurtons. Overnight by Bicknells.
